

Appl. No.: 10/066,908  
Atty Docket: CG-716  
Inventor: Montgomery

**In the Specification**

At page 8, line 20, please add the following new paragraph:

Referring now to Figure 12, a perspective view of the closure-container package having the on-direction stop mechanism 230 (Figure 6) is shown having the child resistance mechanism 330 of Figure 9. As shown in Figures 6, 9, and 12 the closure 10 is fully seated on the container 14 in order that the closure and container lugs 254, 256 are fully engaged providing the on-direction stop mechanism. At the same time the closure CR lug 340 is rotated past the container CR lug 342 inhibiting back-off of the closure 10. Thus, the closure 10 cannot be rotated further on or off of the container neck 14 providing both on-direction stop and child resistance features.
